

1664.

# Apollo Anglicanus.

## THE ENGLISH APOLLO.

Astronomically observing, and

Astrologically demonstrating, those  
grand Catastrophes, and superlative

Actions designed by the Heavens

to be manifested in the World

this present Revolution.

With necessary Tables, and remarkable

Observations on the Conjunction of

SATURN and JUPITER.

A two fold Kalender, viz. Julian or English,

Gregorian or Forain Computations, more plain and

toll than any other; with the Moons Rising,

Setting, and Southing dayly observ'd.

Being Bissextile or Leap-year.

By RICHARD SAUNDERS

Student in the Celestial and Physical Sciences.

*Cognosce alias, ut te cognoscas; cognosce totipsum, tu cog-  
noscas Deum.*

*Est Deus in Caelo revelans arcana que ventura sunt in No-  
vissimis Temporibus. Animis hæc scribo non Auribus.*

LONDON, Printed by E. Cotes for the  
Company of Stationers, M. DC. LXIV.

A Table shewing how many years Purchase a Lease or Annuity, to endure for any Term of years under 33. is worth presently at Interest upon Interest, at six in the hundred: and shewing plainly how to discount any Lease in Being, and the true value of the Reversion after any number of Years.

The use and explanation of this Table.							
Years of a Lease	Years	Months	dec. par	The first Column towards the left hand, sheweth the years of a Lease or Annuity, and right against each Year, is the Years Months and Decimal parts of a Months purchase, that such a Lease or Annuity is worth.	Years of a Lease	Years	Months
1	0	11	0	Example.	17	10	5
2	1	9	9	Suppose a Lease or Annuity to continue ten Years, and you would know how many years purchase it is worth in present money, look in the Table for ten years of a Lease to the left hand, and against the same you shall find 7,4,3 which sheweth such a Lease to be worth seven years four months, and three tenth Parts of a Months purchase.	18	10	9
3	2	8	1		19	11	1
4	3	5	9		20	11	5
5	4	2	5		21	11	9
6	4	11	0		22	12	0
7	5	7	0		23	12	3
8	6	2	5		24	12	6
9	6	0	6		25	12	9
10	7	4	3		26	13	0
11	7	10	7		27	13	2
12	8	4	6		28	13	4
13	8	10	3		29	13	7
14	9	3	6		30	13	9
15	9	8	5		31	13	11
16	10	1	3	Again are you to take or buy	32	14	1

the Reversion of any Lease or Annuity, work thus. Suppose the Lease to be thirty years in all; you find in the second Table, and right hand against thirty, 13 years 9 monthis, and two tenth Parts of a moneths purchase, this it were worth, were it in present possession. But suppose there be a Lease of five years (more or less) before your Commence; look in the Table against the five Years, and there you find four Years, two Moneths, five tenth parts, halfe a Moneths purchase; take this out of the sum against thirty, which is 13,9,2. 4,2,5. The remainder is 9, years six moneths, seven tenth parts of a month; and so much is the Reversion after five years worth, the remainder of thirty years. This is usefull and very easie.

The Law is good, like Arms, the way to peace;  
Peace bringeth plenty, makes our sorrows cease.

If Truth and Justice with it goe along,  
You need not much amongst the Lawyers throng.

Both Law and Arms, I honour each Profession;  
They're better in their ends, then in possession.

But if y<sup>e</sup> nothing bring, away be gon;  
Full pockets now are only lookt upon.

*Directions for the subsequent Diary, or Almanack.*

1. **I**N the first column to the left hand, on the left hand page, you have the Numerall figures of the days of the Month.
2. In the second column you have the week days, and Dominical Letter.
3. You have all the principal and observable Saints days and others; the places of the Planets, and the Moon most nights, with what fixed Stars she is with, is observed, by which the Asterisms and constellations are easily known to an ingenious eye and understanding.
4. The Moons place in the Zodiack every day at noon.
5. The age of the Moon, by which the Tides are known.
6. The rising or setting of the Moon, every day in the year.
7. The general state of the weather, with much care performed by the Author.
8. In the 3. column, the first on the right hand, you have the English account. In the 4. the Forain. In the 5. the Roman week days, and Sunday Letter.
11. The perfect Roman Kalender and Saints days.
- 12, 13, 14, and 15. the utmost to the right hand, you have the dayly rising and setting of the Sun; with the Moons Southing.

*A Table to find when the Moon will be full South every day this year, whereby the time of Tides is exactly known.*

M. A. H. b. f.				First find her age in the 5. column of the Alma-	
1	16	11	48	ack,	which is exactly every day noted; which age
2	17	1	26	seek out in one of the two columns of this Table to	
3	18	2	24	the left hand, against which in the third and fourth	
4	19	3	13	columns is the hour and minutes which shew the	
5	20	4	0	time of the Moons being South.	
6	21	5	48	As for Example, the 7 day of March the Moon	
7	22	6	36	is 19 days old, which being found in 2. column of	
8	23	6	24	this Table against 4, in the right hand it points to	
9	24	7	13	h. 12 m. at which time the Moon is South the	
10	25	8	0	said 7 day of March, 1664. <i>Et sic de ceteris.</i>	
11	26	8	48	Here, note, that all the increase she cometh to	
12	27	9	36	the South in the evening following the Sun; but in	
13	28	10	24	the decrease, in the morning going before the Sun.	
14	29	11	12	By any Sun-diall you may know the hour of	
15	30	12	0	night by adding to the time of the Moon being	
16	31	1	12	South after, or subtracting before.	

To find the time of high water in most Coasts of England.  
 First, as you before were taught, find at what time the Moon  
 will be South, for then you may easily conclude it High-  
 water at Southampton, Quindborough, and Portsmouth, for there  
 the South and North Moons make a High-water. But when  
 you desire the time of Full in any of the following Coasts in  
 the ensuing Table, find the name of the place, and see how many  
 hours and minutes be annexed thereunto in the column under  
 H.M. which added to the time of the Moons coming to South,  
 gives you the time of High-water for the place required.

A Tide-Table, with the Names of the Havens.

<b>R</b> ochester, Maldon, Aberdeen,	0 45
Gravesend, Romney, Ramkin,	2 30
London, Tinnmouth, Harilepole,	3 0
Frib, Leith, Dunbar, Warbon,	4 30
Newcastle, Fulmouth, Hamber,	5 15
Lin, Antwerp, Plimouth, Hull,	6 0
Bristol, Lanion, Faulnesse,	6 45
Milford, Bridgewater, North-coast,	7 30
Portland, Peterport, Hartflew,	8 15
Dover, Yarmouth, Harwich, Dublin,	10 30
Callice, Rye, Winchelsey, Calbar,	11 15

Example.

**T**he 7. of March this year, it is required to know the time  
 of full Sea at New-castle: by the Kalender over against the  
 7. of March, in the fifth Column, I find the Moon nineteen  
 days old, and by the foregoing Southing-Table, I find the  
 Moon South at 3 hours 12 minutes in the morning; then in  
 the preceding Table, against Newcastle I find 5 hours 15 mi-  
 nutes, which added to 3 hours 12 minutes, the aggregate is  
 8 hours 27 minutes, wherefore I conclude it High-water there  
 at 8 hours 27 minutes in the morning: so of any other.

Take notice that the Tide floweth one point of the Compass  
 more at the Spring Tide (which is the New and Full Moons)  
 than at the Neap Tides (the first and second Quarters) as also  
 the latitude of the Moon, and Winds, may alter it an hour  
 sooner or later: let it be their providence who depend upon  
 the Tides, to make timely provision.

The Tides like tymons Runners never rest,  
 With constant inconstancy at best.

October 1664

Let me invite the sons of Art especially those who travel  
west of us in longitude to observe that central Ecliptical  
conjunction that by his retrograde motion makes with the  
(the 25 instant from four to 10 after) according to the  
tables & ingenious calculation of our honoured country-  
man Mr Vincent Wing & other Ephemeris-masters, but af-  
ter Argol it is the 1 d: about 10: fore: and not central, the  
observed verity of this will much correct or confirm our ta-  
bles.

Here could I shew, that under every Sign  
Th' Eternal grav'd some Mystery Divine  
Of his decree, where we (as in a Glass)  
May see what shall hereafter come to pass;  
As Antique and Authentique Roles forequoting  
To sublime Spirits, &c. euen's most worthy noting.

\*\*\*\*\*

*Of the four Quarters of the Year, and first of the Spring.*

Pronaq; cum spectant Animalia Cætera terram,  
Os Homini sublime dedit, Cælumq; robor  
Jussit, & erectis ad Sydera tollere Vultus.

*When other Creatures on the Ground do pore  
Nature gave man a high erected look  
The Heavens to view, and Deities to adore  
And read the Characters in that fair Book.*

**T**HE Contemplation of the glorious Heavens  
(the work of the immense Creator) being  
the Subject of our Speculation, (courteous  
Reader) we shall not long detain you from it;  
for in the ensuing we have omitted *priora repetere*, all  
repetitions of former concerns; onely give me leave  
by way of information, to satisfy my Reader concern-  
ing the mistake in some few of my last years Alma-  
nacks, which was an error committed through the  
Printers negligence of misplacing the names of three  
moneths, only in the last Impression. But for the time  
to come, you may expect his diligence will make  
amends.

Pardon this digression, and turn your eyes to behold  
the welcome Spring, called the vernal Quarter, a vireudo-  
*quæ omnia virent* & florent, which this year takes  
its beginning with us, March 9. at 6. in the afternoon,  
at which time the visible glory of the Creation enters  
the first Scruple of Aries, equalizing day and night;  
The natural temper of this Season is hot and moist, but if  
the weather vary and deviate from its proper temper,  
viz. as to be windy and dry, then it is bad for old people  
and child-bearing Women; if the Spring be very wet,  
expect multiplicity of dangerous Agues the Summer  
following, with Phlegmies, Verrigos, Imposthumes, and  
the like; but if very wet and warm, with many South-  
windes, it is likely to breed dangerous and infectious  
diseases;

### *A Prognostication.*

diseases; *Melancholly* persons are best in health this Quarter, the *Sanguine* constitution the contrary; because blood too much abounds; therefore it is good for *phlethorick* bodies to breathe a vein. Those diseases which proceed from excess or putrifaction of blood, are most dangerous; but those distempers that have their original from *Melancholly* are less noxious; beware of taking cold evening and morning.

For the constitution of the weather, I have in each moneth fully and plainly demonstrated; wherein, as in a glass, you may see the season, by comparing and considering the *diary* Prognosticks for which I have taken pains, which I wish may be more pleasing to the Country man then last year, wherein they thought, and said, I spake too much truth, viz. In plainly prognosticating those Floods and bad weather that so much annoyed the Country. In which I could heartily have wishd I had erred. For the First part of this Quarter March and April, the weather will be very various, cold, and high winds, wet and slabby oft, as you may discern in the monthly pages; but the other part of the Quarter will be cool and dry; in May seasonable, and strong rains, storms & wind in June, yet for most places seasonable.

As for general affairs, discontentedness, an evil spirit possessing the mindes of many is to be heeded, as more largely is observed on the Eclipse of the Moon following.

The Position of *Saturn* promoteth *agriculturam* & *structuras*, fortunates the Country-mans diligence in Husbandry and Building, and inclines *Citizens* to Country-houses; yet *Mars* will so impede the societies of men, ut neuter alteri fidat.

*Venus cum Cauda* stirs up in them more fondness and illicit loves then usual, from whence many illegitimate births *pregnantibusque quoque felicitas, & famellarum copiosior per annum partus innuitur.*

*Culturam Agrorum* fortunat, fortunateth the Husbandman, and promiseth good increase; likewise many shall be enriched by the accessions of *Inheritances*, gifts, and Donations by the dead, and by the finding of hidden

Trea-

Treasures, this year will be fortunate to that discovery, *Augmentationem donorum plurium, Hominum & reliquis mortuorum, & ex hereditatibus & Theſauris Abſconditis.*

Science and Art is like to prosper, *ſecreta ſcientiarum adiligentur & publicentur.*

To conclude, *Hæc revolutio mundi calida conſilia, & proditiões ſignificat, ac ſeditiones vulgi, bella & pugnas efficit, genera morborum varia ac gravia portendit, ſervos malignos & perfidos denotat, Rumores varii increſceſcent, varias rerum perturbationes minari videtur, ac quibusdam magnatibus jaſturam Honorum portendit, nonnullis vero interitum, alioquin tamen annus hic fertilis futurus eſt.*

Of Summer.

WHEN the Summer Quarter is dry, and full of North windeſ, and the Autumn ſucceeding rainy, and South windeſ frequent in it, then expect Coughs, Rheums, Hoarſneſs, and increaſe of Conſumptions, with great pains in the ſtomack and head the Winter following. This Quarter is naturally hot and dry, the ſlegmatick are beſt in health, the cholericke the contrary; this ſeaſon favours old age, and debilitates youth: This Quarter takes beginning with us June 10: a little before 9. at night, cauſing unto us, and all that live on this ſide the *Æquator*, longeſt dayes and ſhorteſt night: it is called Summer, *alias Sun Mebr* by the Germans, and our Saxon Anceſtors, *Quia tunc plus ſolis*, becauſe then we have more of the Sun: then at other times.

The Poſition of the Heavens promiſe an indifferent good ſeaſon, probably ſome increaſe of contagious diſtempers this Quarter, principally in the Country, (which let us pray that God averr) and *Apparitiões ignium in Aëre*; fiery Apparitions, if not a Comet; are frequent this Quarter, the ſpirits of the vulgar too apt to inſult, and contentions about debts, and defraudatiões betwixt Superiours and Inferiours, yet the Nobility thrive and prosper, *erunt Homines dedui Amori mulierum, Muſicæ, jocationi, & ornamentiſ, bonam diſpoſitiōnem Divitum & magnatum*; the rich and great have opportunities of much happineſs, if they will be juſt and humble, and avoid envy and pride.

320 A Prognostication.

Many dolefull knells I fear are rung this Quarter; and grisly death is frequent in his visitations; Oh, the worth of a good conscience.

¶ With the ☽ *Optimum ecclesiasticis* signifies; much unanimity and love between the Clergy and Laity, a timely discovery and confusion to those plots that are hatcht in opposition to this happiness.

One word to the Reverend Clergy.

Know God, known teach him; as thou teacheest meads;  
So shall thy Flock be as well taught as fed.

Of Autumn.

Which takes beginning, this year, September 12. a little before high noon, the Sun then entering the first Scruple of *Libra*, producing the second Equinox, to all on this side the Polar Circles: It is called Autumn from *Angeo*, quia tunc fruges Augentur, then the fruits of the earth come to their perfection in Quantity and Quality; this Season is by nature cold and dry, therefore the sanguine are now best in health, and the Melancholly subject to distempers, best for youth, but worst for age; when this Season hath frequent North winds, and is dry, then are men and women of moist, flegmatick complexions, in best health; but men of other constitutions and natures shall be afflicted with dry diseases, with long and sharp Fevers.

This Quarter the Jews own for the first Quarter of the year, and their reason is, *Quia tempus est fructuosum*, according to that in the Scripture, *Et prorulit Terra Herbam virentem*, and the Earth brought forth the green Herb yielding fruit according to its kinde.

This Season, the weather is like to be answerably favourable, for the most part; and the raging violence of Diseases begin to slack, which is comfortable to surviving souls; and good seasonable Healthy weather concludes the Quarter.

*Auferentur a populis Marores, & veniet eis res de quibus poterunt latari, Cessabunt rixae & omne Horribile.*

*In fine, vertetur Maror in gaudium:*

Of Winter.

**H**Yems vel Hyemps quod tunc multi imbres; vel dicitur  
Hex *ἥλιος*, vel *ὁ* pluvia profundo, as bringing win-  
terly, wet, slabby weather. This Hyemal Quarter takes  
beginning this year on the tenth of December, half an  
hour past 11 at night, for then the Sun enters the first  
Scripte of the Tropical signe Capricorn, the dayes are  
with us at shortest: This Quarter though with us ac-  
counted the last, yet by Numa Pompilius, the Roman, it  
was accounted the first, and for this reason, *Quia tunc*  
*Sol ad nos ascendere incipit.*

The Natural temperament of this Quarter is cold and  
moist; from hence it is that *Touth* and *Cholerick* people  
are best at ease, and in health; but age and *stegmatick*  
constitutions are most distempered; if the Winter be  
dry, and much abound with South-winds, without frosts,  
it createth pains in the brest, *Costiveness* in the belly,  
stopping of urine, with sharpnels, exulcerations and in-  
flammations.

Let all discreet persons be cautious of their healths  
this Quarter, avoiding colds and heats, yet the wea-  
ther is like to be seasonable the latter end of this year,  
and beginning of the next; frequent frosts, snow, and  
sometimes rain, good winterly weather.

*Infortunatæ, anxietatem, pressuram & obsidiones, in*  
*principio, finis tamen erit laudabilior.*

I have observed one Position of Heaven that seems to  
intimate the reuiuification of ancient laudable Customs.  
In all Learned Societies, that great omission of Readings  
in the Honorable Societies of the Law, and other lau-  
dable exercises, will be more frequently and nobly used,  
*Nam Homines multum se dabunt bonitati, iustitiis, & ex-*  
*positionibus legis, &c.*

Of the Eclipses this present Year. 1664.

*Bis hoc Anno Luna obscurabitur, Sol uera Nuppiam.*

**T**His present Revolution presents us with two  
notable Eclipses of the Moon, neer the Nodes  
which is the reason that the Sun suffers no Eclipse  
this year, as I have observed in my Prognostication

## A Prognostication.

1662. our honored Countrey-man Mr Wing (and his Tables make it out) observes two Eclipses of the Sun; which is true, but they are so small and inconsiderable, that *Argol* takes no notice of the first, nor *Eichstadius* of the second.

It's a Comprobated verity, that when the Moon suffers two Totall Eclipses neer the *Nodes*, there can be no Eclipses of the Sun that year as the years 1678. 1682. 1689. 1693. 1700. will demonstrate, as likewise in the years of grace, 1673. 1677. 1680. 1691. 1696. 1698. There will be each year two Centrall Eclipses of the Sun, and consequently none of the Moon; it's a true maxime, *Quanto minus enim Luminaria obscurantur, tanto levius nocent; contra, quanto plus luminis amittunt, tanto vehementius operantur.* Therefore the effects of this Eclipse must needs be vehemently operations by reason the Moon loseth all her light, and is an hour and more in total darkness.

The first of these notable Lunar Eclipses will exhibit it self on the first day of *February*, half an hour past two in the afternoon, to them that inhabite the more Eastern parts of the world, as *China*, *Tartary*, *Japona*, & *insulis Phillippine* and the *Moluccoes*; it will be *Meridionall* to them who inhabite East of us 9 hours 34 min. of time. This Eclipse will be totall, but not seen of us, by reason the Moon is under the Earth; therefore I shall speak no more hereof, *Nam & Eclipses parum nocent ubi non videntur, &c.*

The second Eclipse of the Moon visible to us, is observable on wednesday the 27 of *July*, according to *Mr. Wings Tables*.

	H.	M.	
The beginning at	09	24	} at night.
The beginning of total obscurity at	10	37	
Middle of the Eclipse	11	25	} morning.
The end of total obscurity	12	12	
The full recovery	01	25	} parts.
Digits Eclipsed	16	22	
The whole continuance	04	01	

According

According to Mr. Streets *Caroline Tables* thus Calculated,  
which I thought good to add, that the *Verity* of their  
Tables may be noted.

	H.	M.
The beginning at	09	58
The beginning of totall darkness at	11	04
The greatest obscurity at	11	42
The end of total darkness at	12	20
The Eclipse ends at half an hour past 1 in the morning.		
The whole continuance will be 3 hours 37 min.		
Digits Eclipted are 15, 7 parts.		

It's worth the exact observation of ingenious persons, that the validity and invalidity of our tables may be discovered, and by this means is known who comes nearest the truth.

The effects of this Eclipse, (according to tradition) begin to operate the 27 of *January* following, and end, the 28 of next *April*, *Apparebit autem Colore nigro, mixto viridi & rubeo.*

This Eclipse falls in the 14 degree of *Aquarius*, and is very formidable, and threatens much Sorrow to the *Western* world; This is the very radical degree of the *Moons* position in the radix of *London*, and in the 10. angle, it hath been the subject of my *Inquisition* (and I find) for several hundreds of years pasts that never any *Plague*, *Contagious Diseases*, *Fires*, *Murthers*, *Seditious Conspiracies*, and tumultuous mischiefs, but hapned either when some eminent *Conjunction*, notable *Eclipses*, or other Malevolent position or transits were made in or very neer the *Angles* of the *City Radix*. viz.  $\Pi$  13.  $\Gamma$  13.  $\approx$  8.  $\cap$  8. which I can cleerly make out. Therefore the preceding *Conjunction* of  $\Gamma$  and  $\Upsilon$  in 13. degree of  $\Gamma$ , and this Eclipse in *Aquarius* do prodigiously threaten *London* with raging *Sickness* and other mischiefs, which I pray God avert; and if averted, let us acknowledge the immediate hand of God in it; for it is a work beyond the common course of *Nature*, and our deliverance may be called *miraculous*: *Ceterum tamen, Qui in genituris suis 14. graduum Aquarii habuerint in Horoscopo, vel solem, lunam, Medium Caeli, vel partem*

*A Prognostication.*

fortune in eodē signo vel in ☿ & ♄, in eodē gradu, provincia, itē & Civitate, Quadrangulo, vel opposito subjiciuntur, ij vim poterit Hujus Eclipsis lunaris experiri poterunt.

Those sad and dismall disasters and raging Sickneses, being by the mercifull hand of the Almighty prevented, Oh ! how happy might England now be, enjoying all the means of Peace and Plenty under a Gracious and fortunate Prince, were that Cursed spirit of Faction allayed; but here An Fleet Heraclitus, an rideat Democritus; whether to laugh or weep I know not; they are so ridiculously absurd on the one side, so sadly Tragical on the other, A mixt Scene offers it self so full of errors and a promiscuous variety of objects, that I know not in what strain to represent it; when I think of those fond conceits, humorous principles, and nonsensical tenents amongst dissenting brethren, I cannot but smile at their folly: *Risum Teneatis Amici*; but when I see such Toys and Trifles turn'd into matters of conscience, I must needs condole their miseries, to see how opinions clash and contend, *pro Aris & focis*, with such have and hold, *de lana caprina*, to write volumes to no purpose, their Satyrs, Invektives, dull and gross fictions, scolding and scratching, would make Democritus to laugh: but to see so many Murthers, Mischiefs, Massacres, so many Battels fought, would make Heraclitus lament, *omnium pestium pestilentissima superstitio*, no Plague like Superstitious Fanaticisme, Sicknes and sorrows come & goe, but a Fanaticke Soul hath no rest; *superstitione imbutus animus nunquam quietus esse potest*, what true Religion is, and of what parts it consists, every Catechisme can informe what Symptomes it hath, and what effects it produceth, but for opinionated divisions and superstitions, no tongue can tell them, no pen express them, they are so many, so divers, so uncertain, so unconstant, and so different from themselves, *Tot mundi superstitiones, quot Caelo Stella*; The consequents are Love and Hatred in the extremes, as Mortanius, *nulla firmiter Amicitia quamque contrahitur hinc, nulla discordia major quam qua à Religionē fit*, no greater concord, no greater discord than that

that which proceeds from Religion. It is incredible to relate, did not our daily experience evince it. *Quam te terrima factiones* have been of late, and are amongst us, what Hurly-burlyes here, and in most parts of *Christerdom*, about this that should inseparably unite us in the greatest bond of Love, unity and Friendship; but the Devil is still a Religious Ape, and doth so combine, Cement, and glew together, his superstitious followers; in Love, and Affection, that they will live and dye together, and with Ratholde the Frisian Prince go to Hell for company; and what an innate hatred hath he still inspired to any other superstition opposite, *aut lita, aut morere*, sacrifice or dye; no greater hate, more continue bitter Faction, Warrs, persecutions in all ages, then for matters of Religion; no such feral opposition; *Juvenal, immortale odium, & nunquam sanabile vulnus*; superstition silences all Relations, Humane, Moral, and divine; it sticks every faction together like so many Burs, against all other factions, Blind Zeal (which is as much a symptome as a cause) creating blind obedience, vain fears, Needless works, Incredibilities, Impossibilities, monstrous Ceremonies, blindness, obstinacy, and desperate resolutions, resolving to dye a thousand deaths, as some Jews did to Pilates Soldiers, *Exerros prabentes jugulos, & manifeste prae ferentes*, Rather then abjure or deny the least particle of their wilful superstition. Thus it is with all Hereticks and Schismaticks; none so passionate and violent in their Tenents, opinions, obstinate, wilfull, refractory, peevish, factious, singular and stiff in defence of them: they'l not only persecute and hate, but pity all other Religions, account them damned, blind, as if they alone were the true Church, they the true heirs, have the Fee simple of Heaven by a peculiar donations; 'tis entayl'd on them and their posterities; their Doctrine sound, *per funem auream de Cælo delapsa Doctrina*, they alone are to be saved, as Luther said of the Jews, *solī salvari, solī Domini terrarum salvari volunt*, tis so with all Fanatick Sects, and Schismaticks; they alone, and none but they can be saved, having a Zeal, as Paul saith,

### A Prognostication.

saith, *Rom. 16. 2.* without knowledge, their Zeal overruns their wits, so powerfull a thing is superstitious Fanaticisme it will suffer no conviction, *Malunt cum illis insanire quam cum aliis bene sentire.* Ruine the weal publick for every small private interest, thus Fanaticisme, *ex hominibus ferat facit,* makes wise men Beasts, Fooles, Fanaticks, and what nor; 'tis therefore exitiosus error, *et maxime periculosus,* nothing so perilous and dangerous to the being and welbeing of men, *Plutarch* calls it *turbulenta passio Hominem consternans,* a pestilent troublesome unruly passion, that utterly undoeth men, unhappy Schismatical Fanaticisme *Pliny* saith *morte non finitur, profert hac suos terminos ultra vite finem.* Death takes away Life, but not Fanaticke Schisme; impious and ignorant are far more happy then they which are thus superstitious; no Torture, no Madness like it, none so continue, so general, so destructive, so violent; therefore with *Plotinus*, is *unus Religionis scopus ut ei quem Colimus similes fiamus* that's the drift of religion to make us like him whom we worship &c. but the giddy brains of Fanaticke Schismaticke, *dum vitant stulti vitia, in contraria currunt,* run into extreams, out of rash Zeal, in opposition to Antichrist and humane traditions, will quite demolish all that tends to order and decency, no Ceremonies, no Fasting-days, no Crosse in baptisme, no reverence at the Holy Communion and Church rights, no Church Musick, no Bishop, Courts, nor Church-government will these have but rail at all Church discipline, Cry down Universities and humane Learning, (but I think these late times have sufficiently shewed us the consequence of it) Quarrel at Hoods, Surplice, Caps, and the like; and abhor all things; and those very things that are indifferent in themselves, and tend only to decency and distinction, they snuff at as a Ston'd horse when he meets a Bear, make conscience of these trifles, and neglect the great things of the Law, and chiefly the Law of Love, and fume themselves into Animosities, they'll admit of no interpretations of Scriptures, no Comments, but such as their own Fanaticke spirits dictate, or their

Reſſo

*Restra ratio*, by which they are with *Socinus* misled, and oftentimes broach prodigious paradoxes, some of them turne Prophets, own secret revelations, will be of *Privy Counsel* with God himself, and know all his secrets; they'll take upon them to define how many shall be saved, and who damned in a Parish, where they shall sit in Heaven, interpret *Apocalypses*, (*Commentatores precipites, & vertiginosos*) and those hidden mysteries they'll apply to private persons, times, places, as their own spirits and private revelations shall suggest, and precisely set down when the World shall come to end, what year, what moneth, what day (as *Doomsday Sidgeweek*, and many the like *Harebrains* in our time) *Hi sunt Asini omnium obstinatissimi*; these call Princes, Magistrates, and their Authorities into question, and act all by the dictates of their own private spirits, these multiply and increase under peaceable Princes and gentle spirits, like *Froggs* in standing water, but I forbear; here is no fear of any danger to our Commonwealth (the Almighty preventing infectious diseases) this Revolution, nor many years, but what ariseth from hence, which I hope the prudent Magistrate will prevent, if not by lenity persuade, by severity force, obstinates to morality and Lastly, let this be a motive to peaceable ends, for the Heavens promise discovery of ruine, and frustration, to all unlawfull designs.

---

*Astrological Ejections of Times, briefly, yet fully and safely directing the right Administration of Physick and Phlebotomy.*

**T**He inevitable detriment that such blind Physicians as are ignorant of the Celestial Influences bring to the Bodies and Conditions of Men and Women by their Chance-medly administrations, is deplorable, and hath made me the more diligent in laying down those Rules & Grounds which may safely direct the wise & honest, and convince the wilfully obstinate, That these following Rules are necessary to the very Essence of Physick, and administration, I need but refer them to their own great Masters, *Hippocrates* and *Galen*, and their Commentators, who chiefly call upon them

## A Prognostication.

them for this knowledge, and esteem them blind and worse then Quacks without it, as *Almanus*; *Sine Clavo ac Remis Navigat, Naufragium tandem facturus, qui absque ulla temporum, Astorum observatione, Medicinam facit*; est enim *Astrologia oculus medici, cujus si fuerit expers, cecus appellabitur.*

*Quamvis Medicina de se scientia sit perfecta —*

*Medicus tamen in opere suo sine Astrologia, non est perfectus.*

As for instance, in the method of practice, let the Physician take the time he is first invited to a Patient, and erect a Scheme of Heaven, & he shall find these verities.

First, if the seventh House be afflicted by the presence or rayes of the Malevolents, the Physician shall not cure.

Secondly, If the tenth House be in like manner afflicted, his Physick is improper, and he will not rightly understand the nature of the disease.

Thirdly, the Physician who first visits his patient in the hour of *Saturn*, his patient shall either be long sick, or long in cure; and shall not recover till both Physician and patient almost despair.

Fourthly, he that first enters upon a cure in the hour of *Mars*, shall find his Patient disaffected to him, and disdain or reject his Medicines, his pains ill rewarded, and his person sleighted; the same if the Moon be void of course, unless in *Taurus* or *Cancer*.

Fifthly, he that makes choice of the hours or good aspects of *Jupiter* and *Venus*, shall have good words from the sick, be well esteemed, and paid for his pains; nay, though he fail in the cure, yet shall he receive no prejudice thereby, (I mean) in his estimation.

The verity of these few particulars will prompt the ingenious to further inquisition: as,

To take notice of the *Crisis*, according to which diversity of distempers appear; as also with *Hippocrates* to observe the Cosmical rising of many Stars violently hot, of which nature are these, *Procyon*, *Syrius*, *Pegasus*, *Equus*, *Capella*, *Hercules Antares*, *Pallitium*, and others, which are proper causes of Epidemical Diseases.

*Phlebotomy* being of such consequence to the Body humane;

humane; it is of necessity that there be a skillfull, judicious and *circumspect* consideration had, as to the causes and ends inducing thereunto: As, whether it be proper for the patient to bleed, for the evacuating of some naughty and superfluous peccant humors; for other wise blood-letting is of dangerous consequence, and openeth a way to many inconveniencies and infirmities. And more generally, that it is not convenient for a *lean* and *weak* man, and for a very *fat* and *gross* man, to be let blood; neither for a *child* under fourteen years of age, nor an old man above fifty and six: Moreover, let not blood when the *Moon* is either in *Gemini* or *Leo*, for one hath power of the *Arms*, the other of the *Heart*, to which some late Writers (I know not for what reason) have added the latter half of *Libra*; but the other signs are good for *Phlebotomy*, according to this following method.

For the Com- } Phlegmatick } y or f  
plexions, let } Melancholick } a the  
blood the } Choleric } being in } n or f  
Sanguine } s or x  
                  } s or m or w

For his Age, let } *Youth, from the Change to the first Quarter.*  
 Age, let } *Middle-age, from the first Quarter to the Full*  
 blood } *Elder age; from the Full to the last Quarter.*  
 in his } *Old age, from the last Quarter to the Change.*  
 } *Times of the year.*

Spring good, Harvest indifferent.

Time of the day.

Morning, after Sun-rising, falling, afternoon, after per-  
fect digestion, the air temperate, the wind not south.

**Nor good to Bleed.**

At the change of the Moon, nor two days before nor after; ☿ ☿ or ☐ of ♄ ☿ ☿ forbiddeth the opening of a vein for 12 hours before, and 10 hours after; ☿ of the Moon with the Dragons head or tail, and the ☿ ☿ or ☐ of the Moon to ♄ or ☿ forbids to bleed a day before or after. ♀ comburieth not good.

**Good to let blood.**

The ☾ in ☿ \* or △ or within the rays of ♃ and ♀  
when the Sun shall be in △ or \* with ♃ or ♀ when ♃ and ♀

## A Prognostication.

and ♀ aspect each other with  $\Delta$  or  $\star$ , or be in  $\star$ ; so likewise when  $\text{H}$  and  $\text{J}$  shall radiate themselves by  $\Delta$  or  $\star$  aspects of the  $\text{C}$  to  $\text{H}$  and  $\text{J}$  are not hurtfull.

♂ being fortunate, and not afflicted, his aspects are good; hurtfull, if contrary.

The  $\text{M}$  void of course forbids not the letting of blood.

### Directions after bleeding.

Sleep not presently, stir not violently;

Use not venery, feed thou warily.

Notwithstanding; for the *Phrensie*, the *Pestilence*, the *Squinancy*, the *Plurisie*, the *Apoplexie*, a continual *Head-ach*, growing of *Choler* and *Blood*, a hot burning *Fever*, or any other extream pain, in this case a man may not tarry a chosen time, but incontinently with all convenient speed he is to seek and use his remedy, as if a chosen time might be respected.

### Rules for giving Purges.

The $\text{D}$ in $\text{S}$	$\text{U}$ , purge melancholy	} With E- lectua- ries.
in $\star$ or $\Delta$	$\text{O}$ , purge phlegm	
with	$\text{Q}$ , purge Choler, $\text{Q}$ not combust	
The $\text{D}$ in $\text{M}$	$\text{U}$ , purge melancholy	} With Poti- ons.
in $\star$ or $\Delta$	$\text{O}$ , purge phlegm	
with	$\text{Q}$ , purge choler, $\text{Q}$ not combust	
The $\text{D}$ in $\text{X}$	$\text{U}$ , purge melancholy	} With Pils.
in $\star$ or $\Delta$	$\text{O}$ , purge phlegm	
with	$\text{Q}$ , purge choler, $\text{Q}$ not combust	
The $\text{C}$ in $\text{II}$	$\text{U}$ , purge melancholy	} With any kind of medicine.
or $\text{III}$ in $\star$	$\text{O}$ , purge phlegm	
or $\Delta$ with	$\text{Q}$ , purge choler, $\text{Q}$ not combust	

These are the common Rules for purging; but indeed I never could much approve of the  $\text{D}$  being in  $\text{III}$  or  $\text{X}$ , especially when she is in  $\Delta$  or  $\star$  of  $\text{U}$ .

Good is	Prepare humours	The	$\text{II}$ or $\text{III}$
	Vomit		$\text{V}$ or $\text{VI}$
	Purge by sneezing		$\text{S}$ or $\text{M}$
	Take Glysters		$\text{V}$ or $\text{M}$
	Take Gargarisma		$\text{S}$ or $\text{V}$
	Stop Rheums and Flux		$\text{X}$ or $\text{VI}$
	Bathe for cold diseases		$\text{V}$ or $\text{S}$
	Bathe for hot diseases		$\text{S}$ or $\text{X}$

In Bathing this is the Rule, be sure the ☿ be in signs contrary to the nature of the disease.

The governing powers in our bodies, are, 1 *Natural*, 2 *Vital*, 3 *Animal*.

*The natural comprehend*

The { Attractive  
Retentive  
Digestive  
Expulsive } Faculties.

The *Natural* power is seated in the Liver, by which are generated the Humors, Blood, Choler, Melancholly, and Phlegm; it is governed by ♃ and ♀ in the use of hot and moist things,

The *Attractive* power is governed by the ☉, strengthened by the ☾ passing through ♊ and ♑.

The *Retentive* faculty is cold and dry, governed by ☿, strengthened by the ♄ passing through ♈ and ♏, especially in the Sanguine.

The *Digestive* and concoctive consists in heat and moisture, governed by ♃, assisted by the ☾ passing through ♊ and ♏.

The *Expulsive* faculty being cold and moist, is adjuvated by the ☾ existing in ♋ and ♏, especially in the Choleric.

2. The *Vital* power is governed by the ☉, having its proper seat in the heart; is best cherished when the ☉ is in good aspects, or within the benevolent rayes of ♃ and ♀: it is most cherished by things of hot and dry, and hot and moist qualification.

The *Animal* faculty, being seated in the brain, is divided into

The { Intellectual  
Discursive  
Sensitive } powers.

The *intellective* and *discursive* are governed by ♀, the *sensitive* by the ☿, and are all strengthened by the benevolent rayes of ♃ and ♀.

The ♄ passing through ruminating signes, as ♊ and ♏, it is good (unless necessity compel) to abstain from Physick; for by experience we finde, they excite vomiting,

## *A| Prognostication:*

miting, the  $\Upsilon$  ascending in her Epicycle, the humours then arising, causeth an aptitude to vomit; the same if the Lord of the house of the  $\Upsilon$  or of the Ascendant be above the earth when you give Physick.

Of sweating: Natural sweat opens the pores, dissolves gross and thick humors, cleanseth the blood, comforts the spirits, helps cold, consumes raw humors, qualificieth and quencheth raging feavers, helps numbness and the Drop sic.

Artificial sweat cleanseth Scabs and Ich, amends dullness in hearing, eases the Stone, dissolves congealed and cold humors, and melancholly blood.

The best signs to sweat in are, when the  $\Upsilon$  is in  $\vee \Omega$  and  $\tau$ , 2 or 3 days after the change, &c at the full Moon.

Note, sweating is better in the evening then morning; for when the body hath nourishment within, then the spirits shall not so easily be drawn forth to the extreame parts.

Note further, that lean and dry, or feeble persons, must sweat little, but fat folks may sweat well.

The eyes are best cured of a Pin, Web, Pearl, or blow, the  $\Upsilon$  being in  $\odot \Pi \approx \times \rho$  or  $\omega$ .

Thus he who ignorantly or wilfully neglects the Magnetick cure of Diseases by sympathy and transplantation, and these Astrological principles; my censure of him is in the words of Hippocrates, *Optimus medentium; Cujusmodi medicus est qui ignorat Astronomiam, &c Astrologiam, Nemo debet se committere manibus ejus, quia non est perfectus medicus.* No man ought to commit himself to such a Phylitians hands, because he is insufficient in Art, and not safe to be trusted.

*Nam Rusticus ad hoc non est Eligendus.*

*Nihil est inter mortales, quod adeo repente exornet, nobilitet, & decemum medicum clarum & famosum reddat, quam hoc ipsa Astrologia.*

Be that in health by Physicks prescript lives,

Sickness t' himself, wealth to Phyticians gives:

Sick, take advise, but well to Nature trust;

Let none with Doctors deal, but when they must.

Let only need inforce us to endure,

Since all the ends of destiny are obscure.

Reader, There is lately extant a usefull and delightfull subject of Palmeltry, and election of good times, for every use and business, long expected, and now published by the Author hereof, in a Pocket volumn. Printed for George Sawbridge at the Bible on Ludgate-hill.

From my House, the three Cranes in Chancery-Lane.

FINIS.
